

Project 3: Implementing Patterns I

Project Description:

In this project, we will practice the implementation of design patterns.

You need to design and implement:

- Bridge Pattern
- Observer Pattern

You can implement both patterns in the same implementation or separately.

Supporting documents:

- Class notes and examples as well as links for patterns
- Design Patterns book by Gamma
- Search on the web to get more information on the patterns

Project Expectation:

- Group executed project
- Submission of Design and Code

Project Submission and Grading:

- 10% of total grade
- Email
 - o Complete documentation on what problem you solved with the patterns
 - o Your code **OR** the location of your solution for the implementation

Project Due Date:

- Submission of the Implementation: EOD 04/07/2019
